- PROFESSIONAL
EXPERIENCE
- Bubble Developer | 2024- Actualidad**

The Elevate

 - Continuous improvement of existing functionalities, bug resolution, and optimization of the platform's infrastructure.
 - Integration of the application with external services, such as Stripe and ChatGPT, to automate processes and enhance product functionality.
 - Configuration and management of databases, workflows, and business logic to ensure efficient performance and system scalability.
 - Implementation of responsive and user-centered designs to ensure smooth navigation and an intuitive user experience.
 - Collaboration with designers, project managers, and other developers to align project objectives and meet established deadlines.
